# The Alt-Chat speech device is an ideal solution for children and adults with communication difficulties.

*It is approved by Medicare, Medicaid and most private insurance programs.*

## The Alt-Chat

Say what you want! Communicate with speed and confidence using one of the fastest and most portable communication systems available!

The Alt-Chat from Talk To Me Technologies is an easy-to-use, powerful communication system designed specifically for individuals with communication difficulties needing a light-weight and portable solution. It's approved by Medicare, Medicaid and most private insurance programs.

The Alt-Chat is an ideal communication solution for children and adults with communication difficulties resulting from Autism, Stroke, Brain Injury, ALS (Lou Gehrig's disease), Cerebral Palsy, Down Syndrome, Developmental Delays and many other similar conditions.

## Flexible.

The Alt-Chat is extremely flexible and supports a wide range of communication skills and abilities for both kids and adults alike. With amazing natural sounding text-to-speech voices from Acapela™ or NeoSpeech™, users can be assured they are communicating with the best voices available. The Alt-Chat comes with a choice of 12,000+ SymbolStix™ or PCS™ communication symbols. Powerful options for direct selection, switch scanning and auditory scanning are included.

## Powerful.

Powerful communication! Communicate with ease using an extensive collection of powerful communication options ranging from very simple, visual scene and symbol-based vocabulary sets to more advanced phrase and core word options. Communicate with confidence using a broad spectrum of vocabulary selected, designed and used by many other communication device users based on real conversations they've had with real people. Much of the vocabulary content also draws from and incorporates the language and vocabulary research of Dr. David Beukelman, Dr. Diane Nelson-Bryen, Dr. Elizabeth K. Hanson, and Barbara Collier.

## Portable.

Take it anywhere! The light-weight (2.5 lbs) and portable design enables adaptability and flexibility across communication environments. It's easy to carry yet can quickly be mounted to a wheelchair or desk. The compact size makes it a perfect fit for individuals with autism, aphasia, ALS, Down syndrome, developmental disabilities, laryngectomy or anyone else needing a small, light-weight, portable AAC device.

## Simple.

Very simple to customize and use! Following a quick and easy setup, users are ready to begin communicating in just a few minutes. The Alt-Chat enables users to communicate using a range of powerful communication options and an easy-to-learn, intuitive interface. It's packed with many different communication options to meet a range of skills and abilities, yet it's easy to customize with personal phrases and messages as well. The included DesktopChat software is a breeze to use for customization and transferring of customized content from PC to Alt-Chat.
