The ChatBox 40XT is an ideal communication solution for children and adults with communication difficulties, who are looking for a portable, rugged and simple speech-generating device.

It is approved by Medicare, Medicaid and most private insurance programs.

The ChatBox 40XT

Say what you want! Communicate with speed and confidence using one of the most portable and rugged communication systems available!

The ChatBox 40XT device from Talk To Me Technologies is an easy-to-use, popular, flexible communication system that is designed specifically for individuals needing a lightweight, portable and durable solution. It is approved by Medicare, Medicaid and most private insurance programs.

The ChatBox 40XT device is an ideal communication solution for children and adults with communication difficulties resulting from Stroke, Down Syndrome, Autism, Apraxia of Speech, Developmental Delays and many other similar conditions.

Portable.

Take the ChatBox 40XT anywhere! It is lightweight and portable at only 2.25 lbs. and measures 8.3 X 12 inches. The ChatBox 40XT is easy to carry and its size makes it a great fit for individuals with Autism, Down Syndrome, developmental delays or anyone else needing a small, lightweight, portable device.

Rugged.

The ChatBox 40XT is one of the most rugged speech-generating devices available. This durable, mid-sized communication device is popular and effective for a variety of individuals (both children and adults alike) who are looking for a simple, portable, flexible and rugged solution.

Flexible.

The ChatBox 40XT device is extremely flexible, offering a combination of features that allow individuals to grow in their communication capabilities. It allows both digitized (recorded) and synthesized (text-to-speech) messages to be spoken by pressing buttons on the keyboard. It also supports single switch, dual switch and joystick scanning. Scanning options include row/column, linear, directional, latched, direct and step scanning. All scanning modes are visually supported with lights on the keys and with auditory scanning.

Simple.

Very simple to customize and use! Following a quick and easy set up, users are ready to begin communicating in just a few minutes. The ChatBox 40XT has a keyboard that can support 10 large keys or 40 standard-sized keys. There are 10 levels of messages available with the ability to move from level to level with up and down arrows. A 2-line, LCD display supports text display of the digitized and synthesized messages and menu-driven setup utilities.
